

PRESENT

Job Title: Front End Developer
Reporting to: Creative Director

Location: London

Present Agency is a creative marketing company founded in 2017. Built for the digital age, we work with our clients holistically to help them tell their story in today's hyper-connected saturated environment. Our highly skilled and talented team delivers a whole compendium of services, from press communication to eCommerce management. Our partnerships span continents and categories, from Italian sportswear brands like Stone Island and C.P. Company to American lifestyle brands like S'well.

We are seeking a self-motivated and experienced Front End Developer to join our team. As a developer, you will help the team construct websites for our eCommerce channels, from conception to execution. Working directly with the Creative Director, the ideal candidate is a driven individual with strong analytic skills and the ability to perform under pressure.

You:

- Previous experience in developing eCommerce websites on Magento Version 2 (frontend), Magento Version 1 and Shopify.
- Ready to jump in the deep end and take ownership of the successful completion of magento based projects.
- In-depth understanding of modern front-end development practices and responsive design
- You will have an appreciation of UX, industry best practices, and accessibility.
- Highly organised with solid experience in project management and planning.
- Experience in specing non-technical briefs and spotting any challenges before a project begins.
- Be able to work on multiple projects at the same time.

Responsibilities:

- Managing the development and deployment of all magento and shopify based projects end-to-end.
- Working closely with the Creative Director and eCommerce team to bring ideas from concept through to reality.
- Developing high quality code, with an eye on re-use, performance and deploy-ability.
- Working collaboratively within a digital team, internal and external, demonstrating an ability to assist others in your team when necessary.
- Peer Review code created by other team members.

Requirements:

- At least 2 years previous experience working with Magento and/or Shopify with hands on experience of Magento 1 or 2.
- Extensive working knowledge of HTML, CSS, Less, JavaScript, JQuery, PHP and Magento layout XML.
- Knowledge of Google Tag Manager.
- Strong understanding of Magento 1 and 2 Theme structure and fallback.
- Ability to work to W3C standards is essential and all websites must be fully optimised

PRESENT

for search engines such as Google and Bing.

- Ability to write short but descriptive code comments.
- Good time management skills and the ability to work well under pressure.
- Good interpersonal skills and the ability to liaise effectively with other members of the team and departments.
- Strong analytical and problem-solving skills.

Permanent position. Competitive salary + bonuses.

Applicants are requested to submit a C.V and covering letter outlining why you want to work for Present Agency and what you can bring to the team to careers@presentagency.com
